Vincent Lighting Systems is the single source supplier for all your lighting needs. Whether a simple fixture or a major production, Vincent Lighting Systems has selections from more than 100 manufacturers. We offer a complete range of sales and rental equipment from dimming and control systems, to lighting fixtures and rigging equipment, and an in-stock inventory of supplies and expendables.

VLS provides theatrical, film/video and architectural lighting for a wide range of customers including performing arts centers, production companies, retail establishments, educational and religious organizations. Our 50-person lighting team specializes in sales, rentals, production services, maintenance and repair.

AT YOUR SERVICE

PROJECT DESIGN & INSTALLATION

Vincent Lighting Systems collaborates with lighting specifiers designing new lighting systems, as well as renovating existing systems, to give them renewed life and flexibility. We examine the end-user's objectives and intended use of the venue, help establish the lighting system parameters and electrical power requirements. Our project management team provides installation information, specifications, control riser diagrams and complete "turn-key" installations.

RENTALS & PRODUCTION MANAGEMENT

Whether you need just one fixture, lighting for a meeting of 50,000 people, or a grip package for a film or video shoot, we offer a complete range of rental equipment. Our inventory features dimming, control, lighting fixtures, special effects, rigging and grip equipment, staging and an in-stock inventory of supplies and expendables. From design concept to delivery, our team is experienced in fulfilling your designs, or working from scratch to develop your plan. We can provide professional installation or labor supervision of fixtures, special effects, dimming and control, power distribution, rigging equipment, staging and curtains.

REPAIR & SERVICE

Vincent Lighting Systems is an authorized service center for virtually all of the products and lighting systems we sell and rent. Factory-trained technicians are available to assist you during and after the manufacturer's warranty period for equipment repair or field service. We maintain a parts inventory and the diagnostic equipment to perform fast, efficient service on a wide range of lighting control systems and equipment. VLS also offers preventative maintenance to keep your equipment running in top condition.
